

Shrey Jain

416-678-8828 | shrey.jain@mail.mcgill.ca

EDUCATION

McGill University

B. Eng. in Computer Engineering, Minor in Applied AI

Montreal, QC

Aug. 2025 – May 2029 (*Expected*)

EXPERIENCE

Software Intern

June 2026 – Present

AI-Intelekt

Remote

- Built and shipped B2B AI tools end-to-end, each delivered with tests, documentation, and Linux deployment scripts
- Developed a pattern-analysis system surfacing recurring issue-resolution patterns across thousands of service records
- Deployed self-hosted translation and writing-correction APIs supporting multilingual business communication
- Created a service-desk assistant with escalation guardrails and automated Jira workflows to streamline support operations
- Built an automated content pipeline with fact-checking in the loop

Software Subteam Member

Sep. 2025 – Present

McGill Formula Electric

Montreal, QC

- Develop embedded software for the driver development systems of a student-built electric race car
- Implemented UART communication and CAT24 EEPROM read/write drivers so the vehicle retains settings and calibration data across power cycles
- Integrate and test embedded features with the team's existing firmware codebase via Git

Engineering Intern

July 2025 – Aug. 2025

Metallurgical Sensors

Mississauga, ON

- Transitioned the team's engineering workflows from MATLAB to Maple, converting computational models and analysis processes between environments
- Built automated CSV processing and data visualization scripts along with branded, reproducible reporting templates
- Wrote documentation and supported floating license setup and onboarding to help the team adopt the new toolchain

Marketing and Inventory Analyst

Oct. 2021 – Aug. 2025

Vision Food Innovations

Georgetown, ON

- Improved the company's digital presence, managed day-to-day finances, and optimized inventory processes

PROJECTS

Velrey Development | *LifeLayer, TimeLog, HabitLog*

- Founded a software company and built three productivity apps designed to help people with ADHD manage routines, time, and habits

Autonomous 3D Printed Car | *CAD, 3D Printing, Arduino, C/C++*

- Designed a car chassis in CAD, 3D printed it, and wired it with an Arduino and sensors
- Programmed the vehicle to drive autonomously and avoid obstacles

Roblox Multiplayer Games | *Lua, Roblox Studio*

- Designed, scripted, and shipped multiplayer games reaching ~1,000 concurrent players, handling gameplay systems, UI, and performance optimization
- Won 1st place at the McGill GameDev Club game jam, leading core scripting on a 48-hour team build

Freelance Real Estate Websites | *Figma, HTML/CSS, JavaScript*

- Designed and built websites for real estate agents during the pandemic, from Figma mockups through development

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Kotlin, C/C++, Lua, HTML/CSS, Bash, MATLAB

AI & ML: Claude Code workflows, LLM APIs (Anthropic), PyTorch, OpenCV, self-hosted model deployment

Frameworks & Tools: Flask, REST APIs, pytest, Git, Linux, Jira, Maple, Figma, Roblox Studio

Embedded & Hardware: Arduino, UART, EEPROM (I2C), CAD, 3D Printing
